
To whom it may concern.

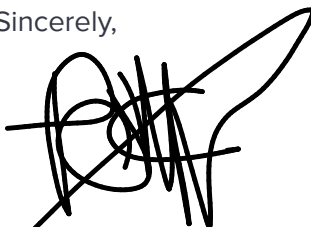

I am writing to confirm that I served as the Chief Technology Officer and direct line manager for Marthinus Hendrik (Marius) Senekal from his first day at Digital Twin (Pty) Ltd on 7 February 2022 until my departure from the company at the end of May 2026.

During these four years, Marius demonstrated exceptional professional growth, advancing from a Junior Software Engineer and Systems Support Engineer to independently owning complex projects and working directly with customers to translate their requirements into bespoke software solutions.

Marius co-developed several major components of ScryUI, our proprietary data visualization, manipulation, and systems management platform, alongside our Lead Software Engineer, Kurt Rohlandt. Marius took full ownership of critical elements of the platform, including custom dashboarding modules and a complex water usage license management engine.

Throughout our time working together, Marius consistently showed impressive initiative and a commitment to continuous learning. I am proud to have managed him, and I have no doubt that he will be a significant asset to any engineering team he joins.

Sincerely,

A handwritten signature in black ink, appearing to read 'Craig Hilton Potter', with a large, sweeping flourish extending to the right.

Craig Hilton Potter
